

PASHA HAWAII®

COOL & SECURE

Refrigerated shipping capabilities to/from Hawaii.

Our next-generation refrigerated containers are designed with the latest technology to ensure optimal energy efficiency, improved cooling capability and high performance—keeping perishable commodities fresh and secure during transport. Pasha Hawaii offers experienced reefer specialists, both on the Mainland and Hawaii.

More Efficient:

- Faster and quicker compressor cycling to minimize power consumption.
- Optimized assembly reduces power consumption, not airflow.
- Enhanced blades and newly redesigned evaporator fans and stators for superior energy efficiency.

More Reliable:

- Enhanced insulation provides high-level, deep-frozen capacity of any unit in the market.
- Better security with improved style of door lock seal and cooling unit bolted into place with a wire-seal to detect unauthorized access.
- Stronger floors to improve loadability and durability.

More Green:

- Reduces CO₂ emissions by greater reduction in power draw.
- Conserves fuel to reduce emissions with digital scroll compressor technology.
- Maximum corrosion protection with aluminized coating.

Call toll-free (877) 322-9920 or your Pasha Hawaii sales representative for further information.
